## **RBESE 2023 CONFERENCE ORGANIZING COMMITTEE**

### **Conference Chair**

**Farooq Ahmed Jam (Ph.D.)**

*Executive Director (GI Social Sciences Forum)*

### **Conference Co-Chair**

**Tariq Iqbal Khan (Ph.D.)**

**Assistant Professor**

*University of Haripur, Pakistan*

### **Conference Co-Chair**

**Muhammad Abbas (Ph.D.)**

*Director Policy & Research ( GI Social Scieces Forum)*

### **On Chee Hoong**

*Manager Operations (GI Social Sciences Forum)*

## Conference Chair Message

**Farooq Ahmed Jam (Ph.D.)**

5th International Conference on Research Methodology for Business Economics, Social Sciences and Entrepreneurial Studies (RBESE-2023)” serves as platform that aims to help the scholarly community across nations to explore the critical role of multidisciplinary innovations for sustainability and growth of human societies. This conference provides opportunity to the academicians, practitioners, scientists, and scholars from across various disciplines to discuss avenues for interdisciplinary innovations and identify effective ways to address the regional and global challenges faced by our societies. The research ideas and studies that we received for this conference are very promising, unique, and impactful. I believe, these studies have the potential to address key challenges in various sub-domains of social sciences and applied sciences. The scholars attending this conference will certainly find it helpful in refining their own research ideas, finding solutions to basic/applied problems they face, and interacting with other renowned scholars for possible future collaborations.

I am really thankful to our honorable scientific and review committee for spending much of their time in reviewing the papers for this event, selecting the best paper awards, and helping the participants in publishing their research in affiliated journals. Also, special thanks to all the session chairs from industry, academia, and policy-making

institutions who volunteered their time and support to make this event a success.

A very special thanks to the great scholars for being here with us as keynote speakers. Their valuable thoughts will surely open the horizon of new research and practice for the conference participants coming from across the globe. I am also thankful to all the participants for being here with us to create an environment of knowledge sharing and learning. We, the scholars of this world, belong to the elite educated class of this society and we owe a lot to return to this society. Let's break all the discriminating barriers and get free from all minor affiliations. Let's contribute even a little or single step to the betterment of society and welfare of humanity to bring prosperity, peace, and harmony in this world. Stay blessed.

## **Type of LBESS Papers**

For this year, RBESE has two types of papers: *Empirical Studies* and *Insight*. Research papers meet the needs of researchers and are reviewed on the basis of highest academic standards. The objective of the academic paper is to contribute to the scientific body of knowledge. On the contrary, Insight papers meet the needs of policy makers and professionals and are reviewed on the basis of high practical standards. The objective of the Insight is to identify the real-world problems and how they can be solved with the help of information systems.

## **Reviewing Criteria**

In LBESS, all papers are judged on the same criteria (relevance, significance, originality, validity and clarity). However some criteria differ between the Research papers and Insight papers.

**Relevance:** Relevance has a great impact on the theme of the conference. The material is relevant and according to the theme of the conference.

**Significance:** Knowledge in different researches in the conference is related to research papers and insight papers.

**Originality:** Ideas that are new for the researchers are used in the conference.

**Validity:** Research papers in the conference are based on theory while the insight papers in the research are based on experimental researches. References are according to content.

**Clarity:** Papers are according to the format, language is easy and understandable by the audience in the conference.

### Acceptance Rates

Submitted Papers	Accepted Papers	Withdrawn	Unqualified papers	Acceptance Rate
28	19	04	05	62.22.0%

### Copyright Agreement

In RBESE 2023 proceedings, all authors have agreed on the copyright agreement. This agreement shows that only authors can retain copyright. It also permits that nobody can use, for non-commercial purpose such as to download, print out etc., an article published in the RBESE 2023 proceedings. All credit is given to the authors and they have copyright agreements. This copyright agreement and use license ensures, among other things, that an article will be as widely available as possible and that the article can be included in any scientific archive.

## **Acknowledgment**

A huge number of people helped in conducting the conference. First of all, thanks to all the members of the Conference and Program Committee and representatives of the RBESE board and their helpers. We also want to thank all the Track Chairs and reviewers, as well as all the members of the Scientific Committee, for their help in the review process and organizing the tracks and special sessions. We thank everyone for their hard work and dedication to this conference and we look forward to the latest episode of the ARSSH tradition.

## The Impact of Social Media on Elderly's Quality of Life in Malaysia

**Sedigheh Moghavvemi<sup>1\*</sup>, Kwang Lee Chen<sup>2</sup>**  
University Malaya, Malaysia

### Abstract

---

Quality of life has become a concern for the elderly, as their physical and mental health issues become more serious as they get older. Research shows that usage of social media helps the elderly in improving cognitive functions such as inhibitory control and reduces negative feelings such as depression, loneliness, and isolation. This study investigated the impact of social media usage on elderly wellbeing. Ten elderly (6 females and 4 males) aged 60 and above who have had at least one year of experience, using social media participated in the interview sessions. The results of the study shows that Facebook had the highest population among participants at 26%. This is because Facebook has a user-friendly interface, allowing the elderly to connect with their friends and family, read news from around the world, and share their daily photos or videos to their friends. There are many advantages of using social media for the elderly – it is convenient, easy to be connected to the world, reduces feelings of depression, loneliness, and isolation, and enables them to find a great deal of information and knowledge. The elderly can control their use of social media; therefore, it does not affect their sleep quality. Some do, however, feel excited when playing online games. The elderly also have positive feelings towards social media use and feel connected to the world. They are also able to stay connected with their friends and family who are far away from them. Social media also provides news features that allow the elderly to stay updated on the news. They can seek needed information such as health information.

## Does Unconscious Bias Affect Psychological Well Being in Ideological and Political Education? Moderating Effects of Self Regulation and Mind Awareness

**Suhaib Khalid AL-Takhayneh**

Department of Guidance and Special Education, Faculty of Educational Sciences, Mu'tah University, Karak, Jordan

### Abstract

---

Psychological well-being is a necessary element for the success of students in any education system, and this aspect needs the researcher's focus. Hence, the present article investigates the impact of the unconscious bias of teachers on the psychological well-being of ideological and political education students in Jordan. The study also examines the moderating impact of self-regulation and mind awareness among the unconscious bias of teachers and the psychological well-being of ideological and political education students in Jordan. The article used survey questionnaires, the primary data collection approach, to gather the data from selected students. The study also used the SPSS-AMOS to check the data and variables' reliability and association with the variables. The results indicated that the unconscious bias of teachers has a negative link with the psychological well-being of the ideological and political education students in Jordan. The results also indicated that self-regulation and mind awareness significantly moderate among unconscious bias of teachers and the psychological well-being of the ideological and political education students in Jordan. This study guides the policymakers in establishing the regulations related to improving the students' psychological well-being by eliminating teachers' unconscious bias.

**Keywords:** Unconscious Bias, Psychological Well-Being, Ideological and Political Education, Self-Regulation, Mind Awareness

## How Is Community-Based Tourism on the Andaman Coast Resilient Amid the COVID-19 Pandemic?

**Prachyakorn Chaiyakot<sup>1\*</sup>, Parichart Visuthismajarn<sup>2</sup>, Parichat Singsaktrakul<sup>3</sup>, Panot Pakongsup<sup>4</sup>, Thamrong Chomphusri<sup>5</sup>**

<sup>1,2,3</sup> Faculty of Environmental Management, Prince of Songkla University, Thailand, <sup>4</sup>Thai Responsible Tourism Association, Thailand, <sup>5</sup>Andaman Discoveries, Phang Nga Province, Thailand

### Abstract

---

The outbreak of COVID-19 in late December 2019 in the city of Wuhan, China, has affected many sectors of the major global economies including travel and tourism. Prior research has studied how infections and crises in the tourism industry can be managed. This article reflects on the socio-economic effects of COVID-19 pandemic on community-based tourism in the Andaman Sea coastal region connecting with the main tourist attractions of Southern Thailand, while revealing the situation in the area before the pandemic, the community adaptations amid the infection period, and offering a plan for recovery strategies for resilience after COVID-19. Data were collected from December 2021 to March 2022 in nine tourism communities of three provinces of the Andaman Sea tourism region using focus group discussions and interviews. Results reveal that in normal times, tourism is a supplementary occupation but generates more income than the main occupation. Socio-economic impacts amid the pandemic were mixed, with both positive and negative effects. The study recommends that community-based tourism should be supported to recover, including restoration, new tour programme designs, online marketing, quality focus on local products, and skills training. Improvements to infrastructure and community hygiene standards are also needed for community tourism after the pandemic

## Teachers' Views on the Effect of Gamified Teaching Approach on Improving Saudi EFL Students' Grammar

**Mohammad H. Al-khresheh<sup>\*1</sup>, Shatha F. Alruwaili<sup>2</sup>**

<sup>1,2</sup>Department of English Language, Faculty of Science and Arts, Northern Border University, Saudi Arabia

### Abstract

---

One of the most challenging aspects of language learning is teaching grammar. There has been an uptick in the number of studies investigating the potential of using games to instruct grammatical concepts. This study intends to assess how gamified instructional methods affect students' grammatical development. For this purpose, a five-point Likert scale questionnaire was distributed to 134 randomly selected EFL teachers. The findings indicated a positive view toward using games in grammar teaching. This positivity stemmed from their belief that games provide a fun learning environment. They can create opportunities for students to learn English meaningfully and offer supportive activities and practises that enable students to connect and communicate. Moreover, games can be pleasant and provide a helpful setting for learning English. They stimulate interaction and communication among students. They offer a purposeful setting within which language is used. Limitations and recommendations were made in light of these findings.

**Keywords:** EFL Teachers, Games, Gamified Teaching Approach, Grammar, Perspectives, Saudi EFL Students.

## The Effects of Cannabis Breeding Lines on Nutritional Content and Bioactive Compounds 2 in Cannabis Leaves (Cannabis Sativa L.)

**Pranot Maniina<sup>1</sup>, Sasirindara Labuab<sup>2\*</sup>, Kasideth Onsria<sup>3</sup>, Yolrawee Tongsaka<sup>4</sup>**

<sup>2</sup>Faculty of Food Technology, <sup>1,3,4</sup>Faculty of Agricultural Innovation College of Agricultural innovation and Food, Rangsit 7 University, Phatumthani 12000, Thailand,  
Abstract

---

Importance of the work: Cannabis is an economic plant with uses in food, medicinal, 11 nutraceutical beauty products and popular recreational/medicinal botanical 12 drug product in the world. However, scant data is available about the nutritional contents and 13 bioactive compounds of cannabis leaves to support the proper consumption. 14 Objectives: To investigate the effect of cannabis breeding lines on nutritional contents and 15 bioactive compounds in cannabis leaves. 16 Materials & Methods: Four cannabis breeding lines, RSU01, RSU08, RSU09 and RSU12 17 were selected and conducted in triplicate and reported as mean data  $\pm$  standard deviation 18 (SD). All data were analyzed by completely randomized design at significance level  $p < 0.05$  19 using the SPSS program (SPSS Inc., Chicago, USA) version 20.0. 20 Results: Each 100 g of cannabis breeding line contained mean nutritional contents and 21 bioactive substances as follows: moisture  $69.62 \pm 2.22$  g, ash  $6.92 \pm 3.28$  g, fat  $10.24 \pm 3.83$  g, protein  $10.44 \pm 3.93$  g, nitrogen  $1.67 \pm 3.94$  g, fiber  $4.20 \pm 4.23$  g, carbohydrate  $5.44 \pm 4.52$  g, energy  $152.07 \pm 3.35$  kcal, chlorophyll A  $41.49 \pm 3.33$  mg/cm<sup>2</sup> 23 , chlorophyll B  $12.08 \pm 3.31$  mg/cm<sup>2</sup> , total chlorophyll  $54.02 \pm 2.95$  mg/cm<sup>2</sup> , antioxidant  $18.35 \pm 2.47$  EC<sub>50</sub>·gL<sup>-1</sup> 24 , total phenolic compounds  $2.45 \pm 2.50$  mgGAE·100 gFW<sup>-1</sup> 25 , and anthocyanin  $8.57 \pm 0.81$  mgGAE·100 gFW<sup>-1</sup>. The contents of  $\Delta^9$ -tetrahydrocannabinol ( $\Delta^9$ -THC), and  $\Delta^9$  26 - tetrahydrocannabinolic acid ( $\Delta^9$  27 -THCA) were 0.10% (w/w) and 1.08% (w/w), respectively. 28 Main finding: Nutritional contents and bioactive compounds found in these four cannabis 29 breeding lines showed potential for wide applications in the food, medical, nutraceutical, 30 beauty products and medicinal botanical drug product industries.

### Abstract

---

Schools consist of a set of behaviors practiced by students, teachers and the community, which are expected to be able to raise awareness as a result of learning so that they can independently prevent disease, improve health, and play an active role in creating a healthy environment. Schools need to be supported by UKS (School Health Business) activities which have the scope and objectives of clean and healthy living practices (PHBS) in schools. This paper aims to explain the significance of the habituation of clean and healthy living behavior in schools for students with strong character. The research was conducted on students in the upper secondary education area of Serang City with a sample of 300 people. Data analysis uses a SWOT analysis approach. The research concluded that education on a clean and healthy lifestyle needs to be promoted together, especially in schools with the aim of broadening the horizons of teachers, increasing the enthusiasm and work productivity of teachers, and facilitating effective communication. Some of the things that teachers do so that children are interested in adopting a clean and healthy lifestyle are disposing of trash in its place, getting used to washing hands after activities, and bringing food supplies to school.

Abstract

---

The industrial revolution 4.0 was marked by the widespread use of technology in various aspects of life, including education. The use of technology in learning is used for the transfer of knowledge, not the transfer of values. This paper aims to examine conceptually the concept of pedagogical learning as an alternative solution in digital era learning. The writing method uses a systematic review by taking literature related to the 2019-2022 period. The results of the study show that digital pedagogy is an approach that is not only based on the teacher's skills in using technology but how the teacher as a facilitator uses technology to build thinking skills as well as develop students' affective aspects. Learning is centered on students and the use of technology is used to foster a dynamic learning atmosphere, is inquiry in nature and students observe and then construct the existing reality. This will build a critical attitude, curiosity, empathy, and seek solutions to reality so that it does not just build knowledge but also social intelligence. Digital pedagogy can be an alternative solution in digital era learning that aims to produce young people who are critical, adaptive, and have social intelligence in facing the demands of the industrial era 4.0.

<sup>2,3,4</sup> Universitas Sultan Ageng Tirtayasa, Indonesia

Abstract

---

This study investigates the moderating effect of firm size and age on the association between ambidexterity and financial performance. The idea is tested using a quantitative methodology in this study. The research instrument was a questionnaire that respondents filled out. The participants in this study are all MSME leaders in Tangerang, Banten, Indonesia. For this study, 216 participants were chosen randomly, and data were analysed using a structural equation model (SEM). This research discovered that ambidexterity has a favourable and statistically significant effect on financial performance. In addition, firm age improves the association between all ambidexterity aspects (product exploration, product exploitation, market exploration, and market exploitation) and financial performance. However, company size has no moderating effect on the association between product and market exploitation and financial performance, only on the relationship between product and market exploration and financial performance. This research is advantageous to the size of businesses with structural distinction through mechanisms underpinning resources and capabilities. In addition, the firm's age and expertise with contextual systems and processes, as well as the mechanisms underlying organizational learning, enable the company to maximize its performance.

## Evaluating the Language Proficiency for German Language Education in Thailand

**Wassamill Watcharakaweelilp\***  
Khon Kaen University Thailand  
Abstract

---

The main purpose of this article is to shed light on the significance of evaluating the language proficiency for German language Education in Thailand. Based on the purposive sampling, 25 students (Academic year 2019) majoring in German at Khon Kaen University in Thailand participated in this study. The screening test consisting of altogether eight short reading texts was employed as a research instrument. Each reading text has 20 gaps to fill in. Hence, the total scores are 160 scores. In terms of data collection and analysis, the students' scores from the test administered by the German Academic Exchange Service (DAAD) in Thailand were collected and analyzed according to the Common European Framework of Reference for Languages (CEFR). It is recommended that language educators can further develop a new language curriculum for foreign language teaching in Thailand based in the test results to serve the requirements of the dynamic society and the global workplace.

## Improving Reading Ability in Students through Hybrid Learning in Elementary Schools

**Sastra Wijaya<sup>1\*</sup>, Ari Gunardi<sup>2</sup>, Dedeh Kurniasih<sup>3</sup>, Uvia Nursehah<sup>4</sup>, Andita Febriyanto<sup>5</sup>**

<sup>1,2,3,4,5</sup> Universitas Primagraha, Indonesia

Abstract

---

This study aims to determine students' reading interests through hybrid learning that implements the use of digital library learning media. This research was conducted at a public elementary school located in Pandeglang, Banten province. The subjects in the study were 28 students of class V, totaling 28 students. The research method uses descriptive qualitative methods, using observation and interviews as data collection instruments. The results showed that there was an increase in students' reading literacy skills after implementing learning through hybrid learning at school. The results of the homogeneity test calculation using SPSS software version 26 for OS Sig.  $0.000 \leq \alpha$  (0.05) shows an increase in literacy skills through hybrid learning which has been modified by the teacher through digital library media. The significance value (2-tailed) of the independent teaching application on student learning outcomes shows the number  $0.000 \leq 0.05$ , then accept  $H_a$  and reject  $H_o$ . While the results of calculating the R-Square value show the number 0.789 or which means that there is an influence number between variables of 78.9%, this has fulfilled the requirements for the relationship between variables through the hypothesis because the number is above 50% which means good. The obstacle found in the implementation of hybrid learning research was students' sense of boredom in reading quickly, this happened because the concentration and focus of elementary school students were still easily distracted from playing activities, so teacher assistance was needed in learning activities. The teacher needs to understand the learning design because to apply hybrid learning to improve students' reading skills, the teacher must adjust the approach according to the different learning styles and learning needs of each student.

## Exploratory Pedagogic Inquiry for Academic Development

**D Marais<sup>1\*</sup>, J Kirkman<sup>2</sup>, R Smith<sup>3</sup>, C Hampton<sup>4</sup>, M Gifford<sup>5</sup>, L Villamediana Gonzalez<sup>6</sup>**  
Warwick University, UK

### Abstract

---

Exploratory Action Research was conducted to evaluate an innovative approach, named 'Exploratory Pedagogic Inquiry' (EPI), which higher education teaching staff, with multiple demands on their time, adopted to inquire into/explore teaching and learning processes, with ultimate benefits for improvement of student experience. During the pandemic, drawing inspiration from work by Smith & Rebolledo, we developed resources and together followed the approach over a period of five weeks. EPI involves participants identifying pedagogic strengths or challenges they are facing, prioritising among them, reflecting on one issue further, and developing related, researchable questions, all within a context of mutually supportive peer-coaching. Weekly whole-group sessions alternated with peer-coaching meetings and individual reflection, culminating in sharing details of individual inquiries with the wider group. The aim of the study was to inquire both into our practice and evaluate our experiences, with a focus on the EPI process. Data was collected from various sources including EPI booklets, personal reflections and semi-structured focus group interviews with the first cohort of the EPI process. The data were analysed using qualitative analysis, content analysis and to a lesser extent, discourse analysis.

## The Challenges Faced Students' of Practicing Social Work during Corona Virus from the Perspective of Mentors: A Qualitative Study

**Dr. Huda Alhajjaj\***  
University of Jordan, Jordan

### Abstract

---

This paper examines the challenges that face social work students in the field course for a Bachelor's degree from the perspective of their professors during coronavirus. And it also adds suggestions to improve the field training course in the future in such a crisis. Also, it aimed to highlight the importance of field training for the students'. To achieve the goals of this study researcher use a qualitative approach, and interview the sample including eight teachers ( 3 males and 5 females) who is teaching and supervising students in BA from the University of Jordan, Albalqaa Applied University and German Jordanian University. The result for this study showed that there are numerous challenged facing students such as; lack of communication between them and the supervisor in the institutions, Student's disapprove of the idea of remote training, and Inability to learn basic skills in intervening with situations and the difficulty of applying them remotely.

Abstract

---

This study uses a two-stage estimation method for its empirical analysis, and taking occupancy ratios, revenue per available room, and total operating revenue as the variables which represent operation performance of hotels. The 2000 to 2015 data from 291 sampled hotels, including the 47 hotels qualified by the rating system of the North American Green Leaf Program, the 32 hotels by the Canada Green Key Eco-rating Program, the 64 hotels by the American Green Mark Program, and the 148 hotels without any green certification, were used to examine the influence of green hotel certification on hotel industry performance by estimating the fixed effect in a panel regression model. The results found that the acquisition of green hotel certification significantly have positive influences on accommodation intention of tourists, RevPar and total operating revenue. That is to say, the green hotel certification can indeed raise hotel operating performance and benefits the hotel industry.

## Why Do Equator Principles' Signatory Financial Institutions Continue Conducting Business Transactions With Companies Violating Social Responsibilities?

**Shou-Lin Yang<sup>1</sup>, Chiung-Ying Lee\*<sup>2</sup>, Ching-Ying Lee<sup>3</sup>, Tzu-Hung Huang<sup>4</sup>**

<sup>1,3,4</sup>National Kaohsiung University of Science and Technology, Taiwan,  
<sup>2</sup>Chang Jung Christian University, Tainan, Taiwan

Abstract

---

This article employs event study and buy-and-hold methods to analyze the impact of banks signing the Equator Principles and their subsequent media exposure for noncompliance. It investigates short-term and medium-to-long-term stock price changes and explores why certain banks violate these principles despite signing them. The findings reveal that banks have both incentives to adopt the Equator Principles and reasons to breach them. Short-term stock price declines show no significant difference between signatory and non-signatory banks. However, medium-to-long-term stock price changes for signatory banks are notably positive, surpassing those of non-signatory banks and the market average. This suggests that banks may sign the Equator Principles for profit maximization but also breach them for the same reason. Market focus on bank profitability makes it challenging to combat such greenwashing behavior through market forces alone, highlighting the need for government policies and system incentives to address this issue.

## **CSR Activity Conducted By GI Social Sciences Forum: Sport Activation for Children against Negative Impact of Internet & Technology**

In April 2016, GI Social Sciences Forum conducted Corporate Social Responsibility program together with Maestro and the Clover as Sport Facility Provider in Bandung, initiating an event with theme:

### **The Objectives of this event were:**

1. Media of education for parents and children to be aware of digital new era and its impact on children's life
2. Facilitate and promote futsal as one of the kinds of sports activation that can be alternative activity for children against the negative impact of internet
3. Social activity and charity engaging orphans to enjoy sports activities together with their friends
4. Corporate Social Responsibility of Company to contribute to the society especially to solve one of the social problems in Bandung.

**Highlights of CSR Activities are given below:**

## **GI Social Sciences Forum Malaysia Team conducted its Latest CSR activity at Rumah Charis, Kuala Lumpur, Malaysia Children Home**

GI Social Sciences Malaysia Team conducted its latest CSR activity at Rumah Charis, Kuala Lumpur, Malaysia Children home. The children home ministry provides care for orphans and single parent children, their homes and activities aim to create a suitable environment to enable children to grow. They help to provide spiritual direction, education, and counselling for the children. Emphasis was given to fellowshiping and spending time with the children over refreshments, as well as presenting them with small gifts and the organizing of special entertainment programmes for the children such as a special game segment. One of the other highlights of the evening was the goodie bags distribution programme carried out by GI Social Sciences Forum

**GI Social Sciences Forum Indonesian Team  
conducted its Latest CSR activity in Ramadan  
for Local Community Welfare, Sharing Happiness  
and developing Orphan Children**

GI Social Sciences Forum Indonesian team conducted its latest CSR activity in Ramadan for orphans. The purpose of this activity was to give happiness and develop orphans with the support of more than 60 volunteers and distribute iftar to more than 400 beneficiaries (yateem, orphans, and dhuafa). GI Social Sciences Forum Indonesian team spent time with children and conducted different activities for their moral self-development.

Highlights of this activity are given below:
